Aus Respekt zum Hund

Due to the information about licensing of character assessment judges in Sweden the complete file has again been discussed from the SV board.

In the former recognition SV assumed that the judges would be judges only for the Swedish WUSV club. As this is not the case we have to assume that Svenska Schaeferhundklubben has no influence to the training of the judges and the contents of the character assessment. Therefore, contrary to our former information, SV can recognize the Swedish character assessment only for conformation shows in Germany but not for breed survey or breeding in Germany. Also with regard to the harmonization within WUSV it is not possible because we reach an agreement only with WUSV clubs. We would like to ask for your understanding.

However, you would have the possibility to have character assessment judges from the range of your club trained through SV for a complete recognition so that the ratings can also be recognized for breed survey and breeding in Germany. Should this be of interest please let me know then I can send you the necessary documents.

Best regards

Anne Fath
